

A Repute 3 HL WAN licence is stored in a USB key/dongle attached to your server.

- 

3. Open your web browser, type `localhost:1947` into the address bar, and press `ENTER`. The Sentinel Admin Control Centre (ACC) will open.
4. On the Sentinel Keys page, you should see an entry for a Sentinel HL-Net 10 listed against Vendor 48297.
5. Make a note of your server's hostname, which is given at the top of the page next to the heading "Sentinel Keys" (e.g. "MITCHELL")
6. Alternatively, obtain the IP address of your Licence Server, as follows. In a command line window, type **ipconfig** and press `ENTER`. Make a note of the **IPv4 address** that appears under the heading **Ethernet adapter Ethernet** (e.g. 192.168.1.78) – scroll up the window to see this

7. Finally, register Repute on every client machine where you want it to be used, following these instructions:

8. When you register Repute, make sure to tick the **Network Licence** box and enter either the **IP Address** or **Hostname** of your server.

For further help, please contact Geocentrix Support quoting your company name and licence no.
